Core ICT

Bringing Benelux businesses
IT services they can rely on.

Lenovo Smarter Infrastructure Solutions

For Core ICT, it's the ease of doing business that differentiates Lenovo from other technology vendors. The first Lenovo Platinum Data Center Partner in Benelux, Core ICT has built close relationships with the local Lenovo team over the years, establishing open lines of communication.

Frank Huyge, Managing Director, says: **“The level of service we receive from Lenovo is excellent. We have a direct line to the local team, ensuring that any questions and issues that arise are always resolved promptly. It's a pleasure to work with Lenovo.”**

In a competitive marketplace, speed of response is key. Backed by Lenovo, Core ICT can respond to demands rapidly, helping the company not only to win new business, but also to retain clients.

“We were the first partner in the Benelux region to be awarded Platinum Partner status, which is great recognition of the trust, value, and mutual respect Lenovo and Core ICT have for each other.”

Frank Huyge
CEO
