# Move

Building custom solutions that perfectly meet clients' needs.

## Lenovo Smarter Infrastructure Solutions

Move's expert solution architects work closely with engineers from Lenovo to build secure, future-proof infrastructure solutions that give clients the technical and financial control that they crave.

Even Brenden, Managing Director of Solutions, says: **"Lenovo offers an impressive array of data center solutions, making it easy to find the right solution to meet clients' needs."**

For Move, Lenovo's extensive product portfolio, tight integration with Intel®, and validated reference architectures with industry leaders such as Nutanix, Microsoft, and VMware make it a one-stop shop for infrastructure.

"After reading a tender, we often reach out to Lenovo for support. Lenovo engineers help us to design and configure the right solution to solve the client's exact technical needs. The team's expertise and insight are extremely valuable."

**Even Brenden**, Managing Director of Solutions,  
Move

### Benefits for Lenovo Partners

- Size and scope of the data center solution portfolio
- Flexible configurations and vendor-certified architectures
- In-depth product knowledge and technical expertise
- Reliable, high-performance infrastructure powered by Intel® Xeon® Scalable Processors
- Responsive support services
- Robust supply chain
